Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 2 is objected to because of the following informalities: the examiner notes that on page 8 of the claims, line 3 recites the limitation "said projection being formed", however, the examiner suggests changing "said" to a, thus mitigating a lack of antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Fulcher et al. (4,722,252).

Fulcher et al. disclose a power driven wrench that includes a rotatable drive rotor journaled on the body of the wrench, the drive rotor includes a shaft body including a polygonal driving end that is adapted to receive a socket and a polygonal opening to receive a screwdriver, the shaft body also includes a hole and a socket retaining member that is disposed in the hole (note the tool as illustrated in Figs. 6 and 8).

Allowable Subject Matter

4. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3723

5. The following is a statement of reasons for the indication of allowable subject matter: It is the examiner's opinion that the provision of the U-shaped reed spring (in claim 2) as a sleeve retaining member, where one of the side plates of the reed spring has a projection, in combination with the rest of the limitations in the independent claim, has neither been anticipated, nor fairly suggested, in part or whole, by the prior art of record.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dickens discloses a multipurpose tool, Chern and Pijanowski each disclose a driving shaft for a power wrench, and Huang and Yen each disclose a screwdriver bit retaining means.
